**General Information:**

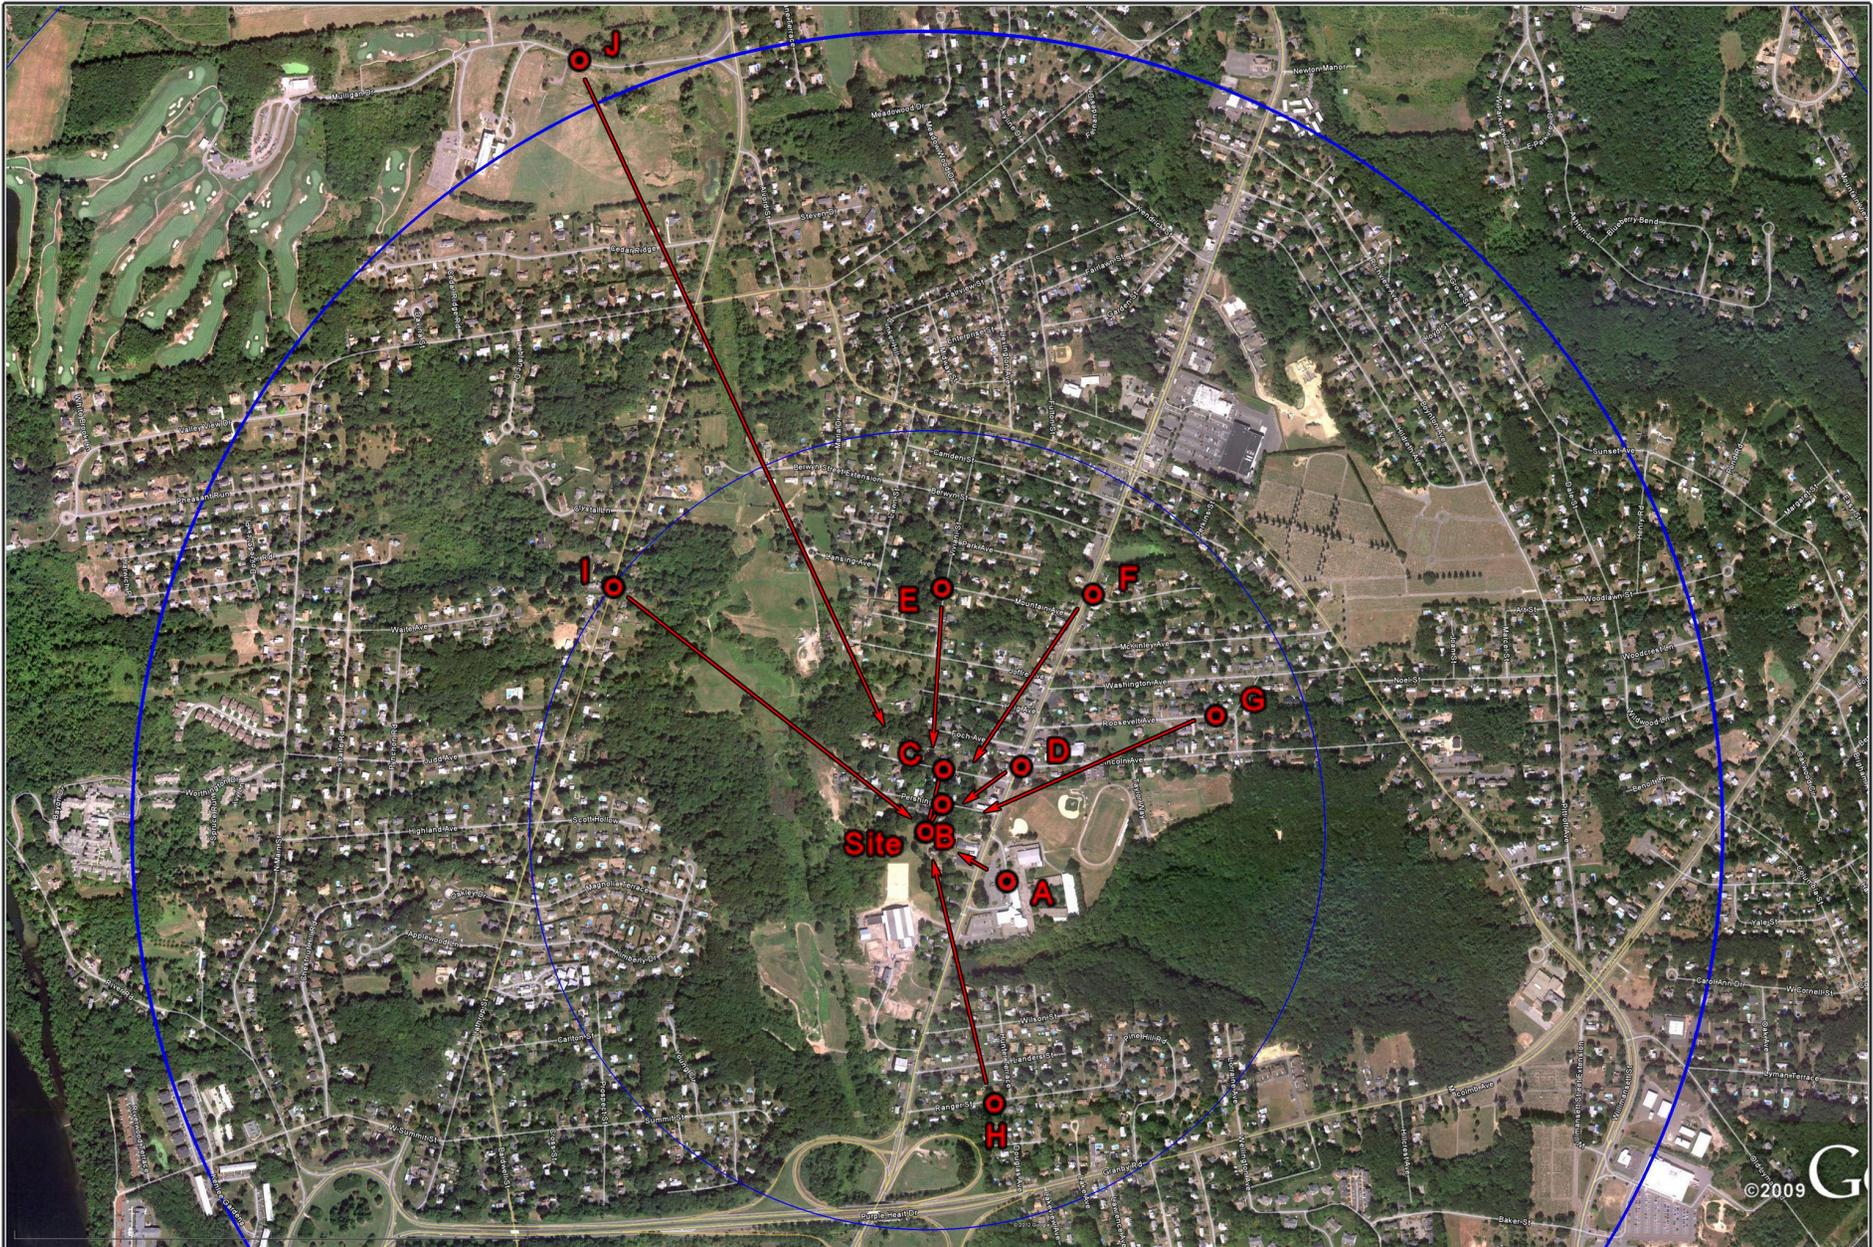

Balloon Test for these renderings was completed Saturday 3/24/2012  
Bottom of upper (red) 7' diameter balloon = 130' AGL  
Bottom of lower (yellow) 5' diameter balloon = 110' AGL  
Photographs were taken only when the inclination was reported  
above 80 degrees off the horizon by an associate on site.  
Winds were light to calm for the duration of the test.

For visual reference only. Actual visibility is dependent upon weather conditions, season, sunlight, and viewer location.

Based upon Rev0 Zoning Drawings by ProTerra dated: 2/13/2012

This visibility study claims in no way to show the only areas where the proposed installation will be seen. It is meant for a visual reference only and represents where our survey crew drove on 3/24/2012 (shown in green) and where the balloons were visible (shown in red) without the aid of a magnification device. Several factors play a role in what was visible during the drive test, such as foliage, sunlight, actual balloon location versus proposed tower location, winds & weather. It should be noted that only the roads highlighted were checked (private property was not, unless permission was granted by the owner).

- **Photographic Rendering Location**
- **Locations where balloons were visible**
- **Roads Investigated on 3/24/2012**

For visual reference only. Actual visibility is dependent upon weather conditions, season, sunlight, and viewer location.
